MEMO FOR: [REDACTED] C/DDS/SSG  
SUBJECT: Estimate of OS ADP Applications

25X1

25X1

1. In reply to [REDACTED] request to the SSG members for an approximation of FY 1967-71 ADP Applications with rough estimates as to size and conversion costs (based on OCS yardstick) the attached listing has been developed.
2. This listing was developed from the coordinated Office of Security report of anticipated computer needs sent to OCS and the DDS 27 July 1964. (Copy attached) A few new possible ADP Applications are included in the attached list based on Survey discussions in various offices, but because of the haste and informal nature of this estimate an Officewide coordination was not conducted. (I believe it advisable to require a new formal coordinated estimate this summer.)
3. For expediency this list of ADP Applications is arranged by Divisions and Staffs although it is realized that several local applications are sufficiently interdependent and related to be included in one common Data Processing System.

25X1
